4-AXLE CONSTRUCTION SEMI LOWLOADERS

WSI MODELS

HIGH QUALITY DIECAST SCALE MODELS

NEW FEATURES OF OUR SEMI LOWLOADERS

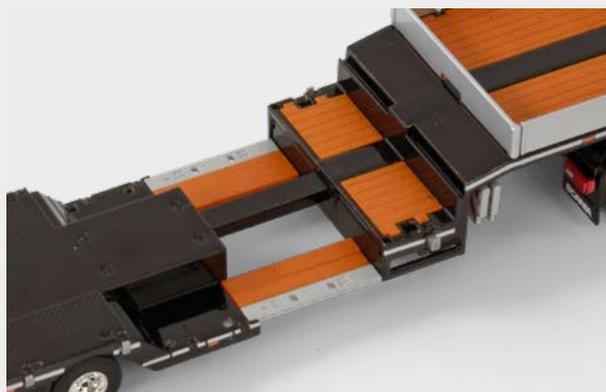

FLATBED VERSION

The semi can be made completely flat in case the wheelbase is smaller than the distance between the wheel arches.

EXTENDED WHEEL WELL

When extending the semi, the wooden panels can be placed in the extended part.

WIDE WELL PANELS

The three panels above the wheel arches can be placed wider. The supports will be needed here.

SIDE PANELS

For wide vehicles, wooden panels can be placed on the side. The supports come in handy here.
